QUICK LINKS

FEATURES & SPECIFICATIONS

Description

- The AirLink Blue two button exterior switch provides multi-level wireless control based on manual activation of a rocker style switch housed in an outdoor, weather-proof enclosure.
- Multiple fixtures can be grouped to be controlled by a single switch.
- Controls 0-10 VDC LED drivers and are rated for indoor installations. The switch enables on/off and dimming control (intensity).
- Switch utilizes a maintenance free, self powered Bluetooth Low Energy (BLE) pushbutton transmitter module with an electro-dynamic energy transducer which is activated by the rocker movement. When the rocker is pressed down or released, electrical energy is created and a set of BLE signals are transmitted identifying the rocker status.

Construction

- Surface Mounted Metallic Enclosure with translucent, plastic cover
- Rated for outdoor installations

Electrical

- Line Voltage Input 120 VAC

Controls

- Multiple fixtures can be grouped and controlled by scheduled time events.
- Max Bluetooth range is 50' line of sight and highly dependent on the integration of fixtures, surrounding environment. It is recommended to conduct testing for range accuracy

Installation

- Operating temperature range of -30°C to +70°C (-22°F to 158°F)
