

# HIGH OUTPUT DOWNLIGHT (HDL)

Performance Driven Illumination

## LSI Helps You Reach Higher.

The High Output Downlight (HDL) by LSI Provides Serious Light for Serious Height — Inside and Out.

## Key Features:

- 7,000 to 10,000 lumen packages offer maximum flexibility for tall mounting heights.
- Wet-Rated from below for use in outdoor ceilings & soffits.
- Self-tightening flag screws and magnetic reflectors make installation quick and easy.
- Compact housing and external driver are ideal for shallow plenums, perfect for both new construction and renovation projects.

## Customizable Trim & Reflector Options

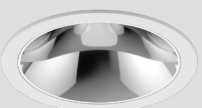

Matte White

Haze Semi-Diffused

Matte Black

Specular

Two standard trim finish options (black & white) and size options (6" & 8") pair with four reflector finishes to fit your design vision.

## Engineered for Powerful Illumination

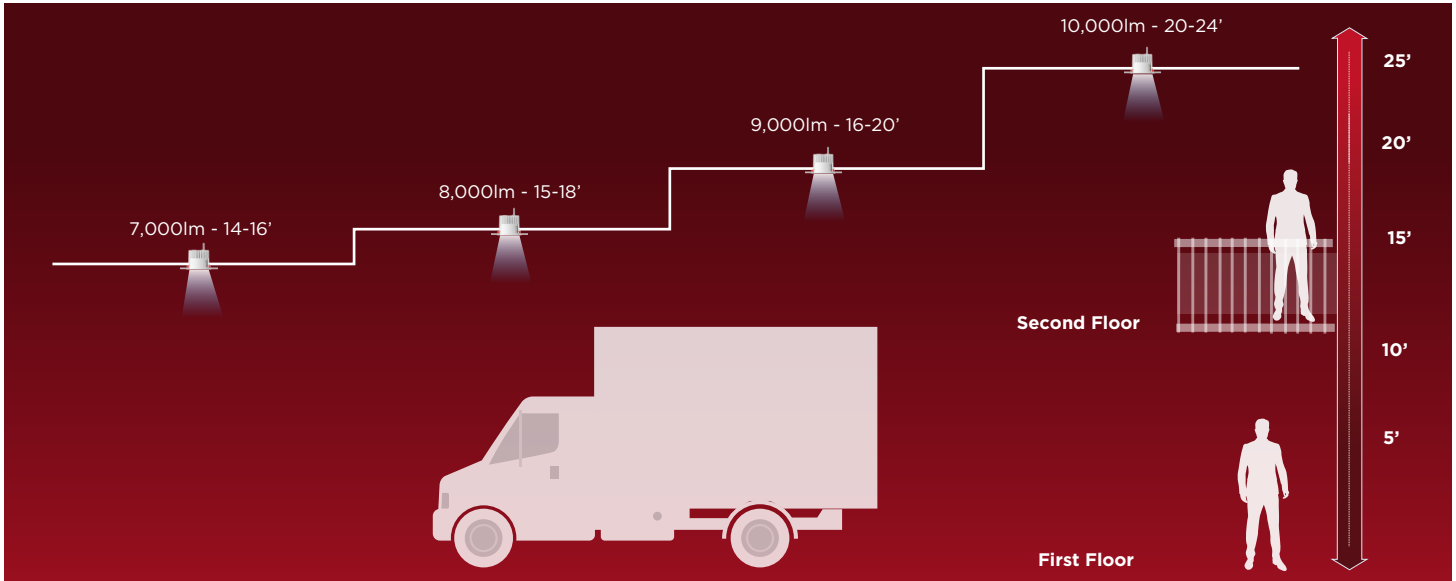

### Built for a Wide Range of Applications

Suited for outdoor overhangs to indoor showrooms and atriums. Choose from four standard lumen packages, with custom lumen packages available upon request.

- 7,000lm - 14-16ft / 8,000lm - 15-18ft / 9,000lm - 16-20ft / 10,000lm - 20-24ft.

### Save Time & Money on Installation

Unlock design flexibility using fewer fixtures to achieve required light levels. Self-tightening flag screws accessible from below paired with magnetic snap-in reflectors ensure a smooth installation - all within a compact, 6 inch tall housing.
