

LSI Lighting: Data Center Solutions

Engineered for the unique demands of data centers, LSI offers reliable, efficient, and innovative lighting solutions across critical areas:

Data Center Spaces

Precision lighting for server rooms and high-heat environments.

Critical Support Areas

Dependable illumination for electrical and mechanical rooms.

Admin & Conference Areas

Stylish, energy-efficient lighting for workspaces and meeting rooms.

Exterior Building

Durable, weather-resistant fixtures for safety and security.

Data Center Solutions

Comprehensive Lighting Solutions

Engineered for Demanding Environments:
High ambient temperature tolerance ensures consistent performance in data center spaces.

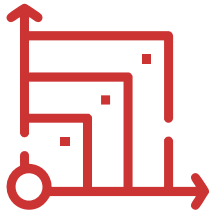

Energy Efficiency:
Advanced LED technology minimizes energy use while maintaining superior performance.

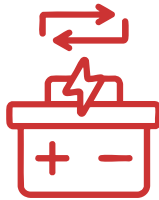

Precision Illumination:
Uniform, glare-free lighting enhances safety and operational clarity.

Smart Controls:
Integrated systems with motion sensors, daylight controls, and remote monitoring for maximum efficiency.

Modular & Scalable Design:
Adaptable solutions to meet growing facility needs.

Emergency Ready:
Fully compatible with backup systems to ensure uninterrupted lighting.

Compliance & Safety:
Designed to exceed data center safety and regulatory standards.
