

Description: High Efficiency Parabolic (PGN)

LSI Agents and Internal Staff,

As we restructure our product portfolio, it is necessary to streamline and evolve our core LED product offering. This will allow us to focus on *newer, more innovative designs and emerging technologies* that are aligned with vertical markets and customers' requirements.

Per our upcoming indoor webinar scheduled for 9/28, our legacy fluorescent High Efficiency (PGN) product is being phased-out and discontinued effective immediately as we have depleted our remaining inventory on this product. Any new orders need to be reviewed to confirm components on-hand and availability. Please start to transition your customers to either our LPEC and LPASC LED Indoor series. Returns (RMAs) for this legacy fluorescent (PGN) product will be subject to our terms and conditions. For any replacement or warranty issues on High Efficiency Parabolics, please consult factory.

All technical information will be removed from the Recessed Parabolic product section of the website first week of October and placed in Phase-Out / Discontinuation section.

Discontinued Products Series	Recommended Product Series
Fluorescent High Efficiency (PGN) Series	Low Profile LED Troffers (LPEC or LPASC)
	

Thank you for supporting LSI; we look forward to bringing you new solutions on an ongoing basis.

Steven D. Lowe
Vice President of Product Management
