Integration Is Our Advantage

One Partner. One Standard.

Streamline vendor management and communication, ensuring accountability

Faster Rollouts, Fewer Delays

Integrated planning and production shortens timelines across sites & programs.

Brand Consistency at Scale

Unified oversight means signage, lighting, and environments align across locations.

Elevated Experiences

Cohesive environments drive better guest impressions, dwell time, and brand recall.

Operational Efficiency

Less handoff means fewer errors, reduced costs, and easier maintenance.

Future-Ready Flexibility

One system built to evolve, supporting innovation, refreshes, and growth.

One Partner for Integrated Solutions. → **Better** Results.

Our Core Values

Authenticity

- Work with each other and other parts of the organization while being honest, open and prepared. Failing is ok, not trying isn't.

Accountability

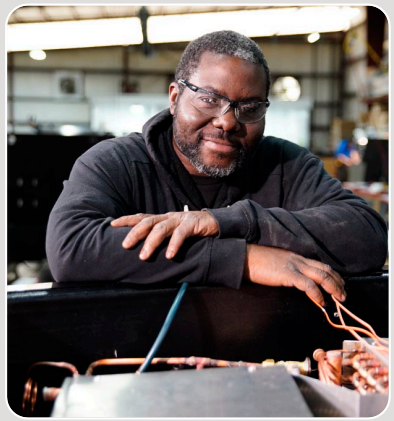

- Be willing to accept responsibility for personal performance and the resultant outcomes and strive for continuous improvement.

People

- Recognize that most company success comes from having an organization where people can prosper and achieve success that makes them feel good about coming to work.

Royston Product Overview

Cabinetry Systems

Royston’s Cabinetry Systems are designed to help retailers create organized, attractive spaces that support both the customer experience and daily operations. Built with durable metal construction and available in a wide range of finishes, textures, and configurations, these systems offer the flexibility to meet unique merchandising and branding needs. From convenience stores to foodservice and specialty retail environments, Royston cabinetry provides a long-lasting solution that combines functionality, consistency, and visual appeal.

Royston Product Overview

Shelving & Merchandising Solutions

Royston's Shelving & Merchandising solutions are designed to help retailers make the most of their selling space while keeping products organized, accessible, and easy to shop. From standard shelving to custom merchandising displays, these solutions support a wide range of product categories and store formats. With durable construction, flexible configurations, and options for integrated branding, Royston helps retailers create attractive product presentations that enhance the shopping experience and drive sales.

Royston Product Overview

Food Service Solutions

Royston's Food Service Solutions help retailers create functional, customer-friendly foodservice environments that support speed, efficiency, and a consistent brand experience. From beverage stations and service counters to condiment areas, pickup zones, and custom cabinetry, these solutions are designed to improve workflow while making foodservice offerings easy to access and navigate. With durable construction and flexible design options, Royston helps retailers build foodservice spaces that work as well behind the counter as they do in front of it.

Royston Product Overview

Checkstands

Royston Checkstands are designed to create a smooth, efficient checkout experience while supporting the unique needs of different retail environments. Available in a variety of configurations, including Belted Takeaway, Carousel, Express, Manual Pass, and Extend-A-Belt models, these solutions help improve workflow, maximize productivity, and enhance customer convenience. Built for durability and daily use, Royston checkstands can be customized to complement a retailer's store design while delivering reliable performance at the point of sale.

Royston Product Overview

Self-Checkout

Royston Self-Checkout solutions are designed to give retailers greater flexibility at the point of sale while providing customers with a fast, convenient checkout experience. These systems help reduce wait times, improve traffic flow, and support changing shopping preferences by allowing customers to complete transactions independently. Built with the same focus on durability, functionality, and store integration found throughout Royston's product portfolio, self-checkout solutions can be customized to fit a variety of store layouts and operational needs.

Royston Product Overview

Royston Construction Services

Royston's Construction Services team provides end-to-end project support, helping retailers move from concept to completion with a single, experienced partner. Services include project management, on-site surveys, concept design, budgeting, A&E permitting, remodels, rollouts, and installation, all coordinated through a dedicated project manager who serves as a single point of contact throughout the project. Backed by in-house design and permitting expertise along with an extensive network of industry partners, Royston helps ensure projects are completed efficiently, seamlessly, and with a focus on quality.

Royston Product Overview

Kiosks

Royston Kiosks are designed to create dedicated destination points within the store, helping retailers showcase key product categories while improving organization and customer engagement. Commonly used for beverage programs, tobacco, foodservice, and specialty merchandising applications, these solutions combine durable construction with customizable layouts, finishes, and branding elements. Built to support both operational efficiency and a consistent customer experience, Royston kiosks help retailers maximize space while drawing attention to high-value products and services.

SOUTHERN CaseArts
An LSI Company

https://southerncasearts.com/

Southern CaseArts Product Overview

Refrigerated Cases

Our Refrigerated Cases are designed to showcase fresh products while maximizing visibility, accessibility, and merchandising flexibility. Available in a variety of configurations, including Multi-Deck, Single Deck, Island, Spot Merchandiser, and Specialty refrigerated cases, these solutions support everything from beverages and prepared foods to dairy, deli, meat, and grab-and-go offerings. Built with premium components, energy-efficient features, and flexible merchandising options, our refrigerated cases help retailers create attractive displays that encourage purchases while delivering reliable long-term performance.

Southern CaseArts Product Overview

Heated Cases

Southern CaseArts Heated Cases are designed to keep hot foods fresh, visible, and ready while supporting grab-and-go merchandising. Available in a variety of formats, these cases are ideal for showcasing prepared foods, rotisserie chicken, and other hot food offerings. With features such as LED lighting, energy-efficient operation, flexible sizing options, and high-capacity merchandising space, Southern CaseArts heated cases help retailers create attractive foodservice destinations that drive impulse purchases and enhance the customer experience.

Southern CaseArts Product Overview

Freezer Cases

Southern CaseArts Freezer Cases are designed to maximize the visibility and accessibility of frozen food offerings while delivering reliable, energy-efficient performance. The product line includes solutions such as the Diablo Upright Glass Door Freezer, which features adjustable shelving, LED lighting, multiple door configurations, and flexible remote or self-contained refrigeration options to fit a variety of store layouts. Built to support frozen food and ice cream merchandising, Southern CaseArts freezer cases help retailers create attractive frozen food destinations while maintaining product integrity and operational efficiency.

Southern CaseArts Product Overview

Food Service

Southern CaseArts Food Service solutions are designed to help foodservice operators maximize space, improve efficiency, and create an inviting presentation for fresh food and beverage offerings. Serving environments like coffee shops, airports, hotels, universities, office atriums, and quick-service restaurants, all cases are designed to support specific merchandising goals.

Southern CaseArts Product Overview

Multi-Temp Cases

Our Multi-Temp Cases provide flexibility to merchandise a variety of fresh foods and beverages within a single display solution. Designed to operate in multiple temperature ranges, these cases allow retailers and foodservice operators to showcase products such as grab-and-go meals, beverages, dairy items, sandwiches, and fresh foods while maintaining product quality and presentation. Southern CaseArts Multi-Temp Cases help maximize merchandising opportunities, improve space utilization, and create a seamless shopping experience for customers.

Southern CaseArts Product Overview

Ambient Cases

Ambient Cases are designed to showcase non-refrigerated products in a clean, organized, and highly visible display environment. Ideal for bakery items, packaged snacks, beverages, grab-and-go products, and promotional merchandise, these cases help retailers create attractive merchandising destinations that encourage customer engagement and impulse purchases. Available in a variety of styles and configurations, Southern CaseArts Ambient Cases provide the flexibility to complement existing store layouts while delivering quality, durability, and presentation expected throughout our product line.

SignResource Product Overview

Main Identification Signs

SignResource Main Identification Signs are designed to create a strong brand presence and help customers easily identify a location. Available in formats such as monument, pylon, and wall signs, these solutions are customized to reflect each brand's unique identity while enhancing visibility and site recognition. Built with quality materials and attention to detail, Main Identification Signs provide a lasting impression and support a consistent brand experience across locations.

SignResource Product Overview

Monument Signage

SignResource Monument Signs are designed to create a strong, welcoming presence at property entrances while providing clear site identification. Available in a variety of styles, materials, and illuminated or non-illuminated configurations, these signs can be customized to reflect a brand's unique identity and architectural environment. Built for durability and long-term performance, monument signs help enhance visibility, strengthen brand recognition, and create a lasting first impression.

SignResource Product Overview

Channel Letters

SignResource Channel Letters are designed to provide high-impact brand identification with dimensional, illuminated signage that enhances visibility day and night. Available in a variety of styles, including front-lit, reverse-lit, combination-lit, and custom configurations, channel letters can be tailored to reflect each brand's unique identity and design standards. Built for durability and long-term performance, these signs help businesses increase brand recognition while creating a polished and professional appearance.

SignResource Product Overview

Canopy & Fascia Systems

SignResource Canopy and Fascia Systems are designed to enhance brand visibility while creating a clean, cohesive appearance across the exterior of a facility. From illuminated canopy fascia and perimeter branding to custom architectural elements, these systems help transform building exteriors into recognizable brand assets. Built to meet brand standards and withstand outdoor environments, canopy and fascia systems reinforce brand identity, improve site visibility, and create a consistent customer experience across locations.

SignResource Product Overview

Pump Valances & Markers

SignResource Pump Valances and Markers are designed to enhance the fueling experience by providing clear product identification and reinforcing brand visibility at the pump. Available in a variety of custom designs, graphics, and illuminated configurations, these solutions help customers quickly identify fuel grades, promotions, and brand messaging. Built to withstand demanding outdoor environments, pump valances and markers create a consistent, professional appearance across the forecourt while supporting a cohesive brand experience.

SignResource Product Overview

Menu Boards

SignResource Menu Boards are designed to clearly communicate product offerings, pricing, and promotions while enhancing the customer experience. Available in a variety of formats, including interior, exterior, static, and digital configurations, these solutions can be customized to meet the operational and branding needs of each location. Built for durability, visibility, and ease of updates, menu boards help businesses present information effectively while maintaining a consistent and professional brand image.

SignResource Product Overview

Project Management

SignResource Project Management services provide a single point of coordination throughout the lifecycle of a signage project, from planning and permitting to manufacturing and installation. Working closely with customers, contractors, and local jurisdictions, the team helps ensure projects stay on schedule, meet brand standards, and comply with site requirements. With a focus on communication, organization, and execution, SignResource helps deliver a seamless experience and consistent results across single-site and multi-location programs.

SignResource Product Overview

Installation Services

SignResource Installation Services ensure signage is installed safely, accurately, and in accordance with brand standards and site requirements. Leveraging a nationwide network of qualified installation partners, the team coordinates every aspect of the installation process, from scheduling and site preparation to final placement and quality verification. With a focus on consistency, efficiency, and attention to detail, SignResource helps bring signage programs to life while delivering a seamless experience for customers.

Hamilton Laboratory Solutions Product Overview

Fume Hoods

Hamilton Fume Hoods are designed to provide a safe, controlled environment for handling hazardous fumes, vapors, and chemicals in laboratory settings. Available in a variety of configurations to support different applications and facility requirements, these systems help protect laboratory personnel while maintaining airflow performance and operational efficiency. Built with a focus on safety, durability, and compliance, Hamilton Fume Hoods support productive laboratory environments across research, healthcare, education, and industrial markets.

Hamilton Laboratory Solutions Product Overview

Steel Casework

Hamilton Steel Casework is designed to provide durable, high-performance storage and workspace solutions for laboratory environments. Engineered to withstand the demands of research, healthcare, education, and industrial settings, these systems offer exceptional strength, chemical resistance, and long-term reliability. With a wide range of configurable cabinets, drawers, shelving, and specialty storage options, Hamilton Steel Casework helps laboratories create efficient, organized spaces that support productivity and evolving workflow needs.

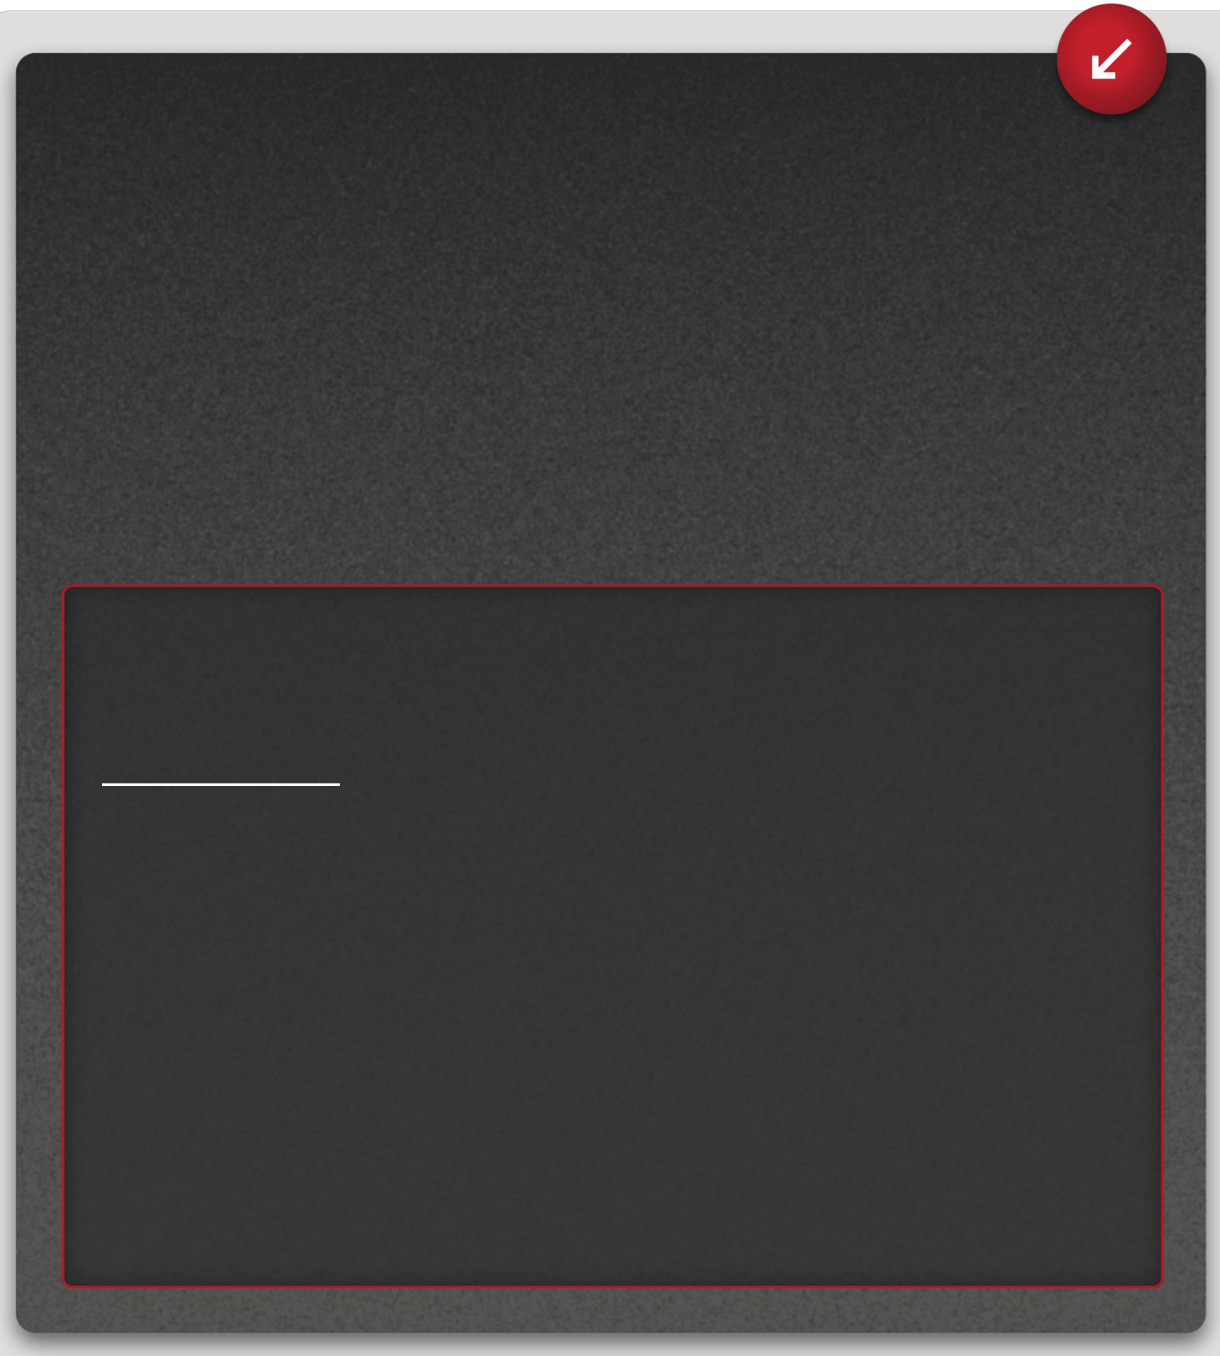

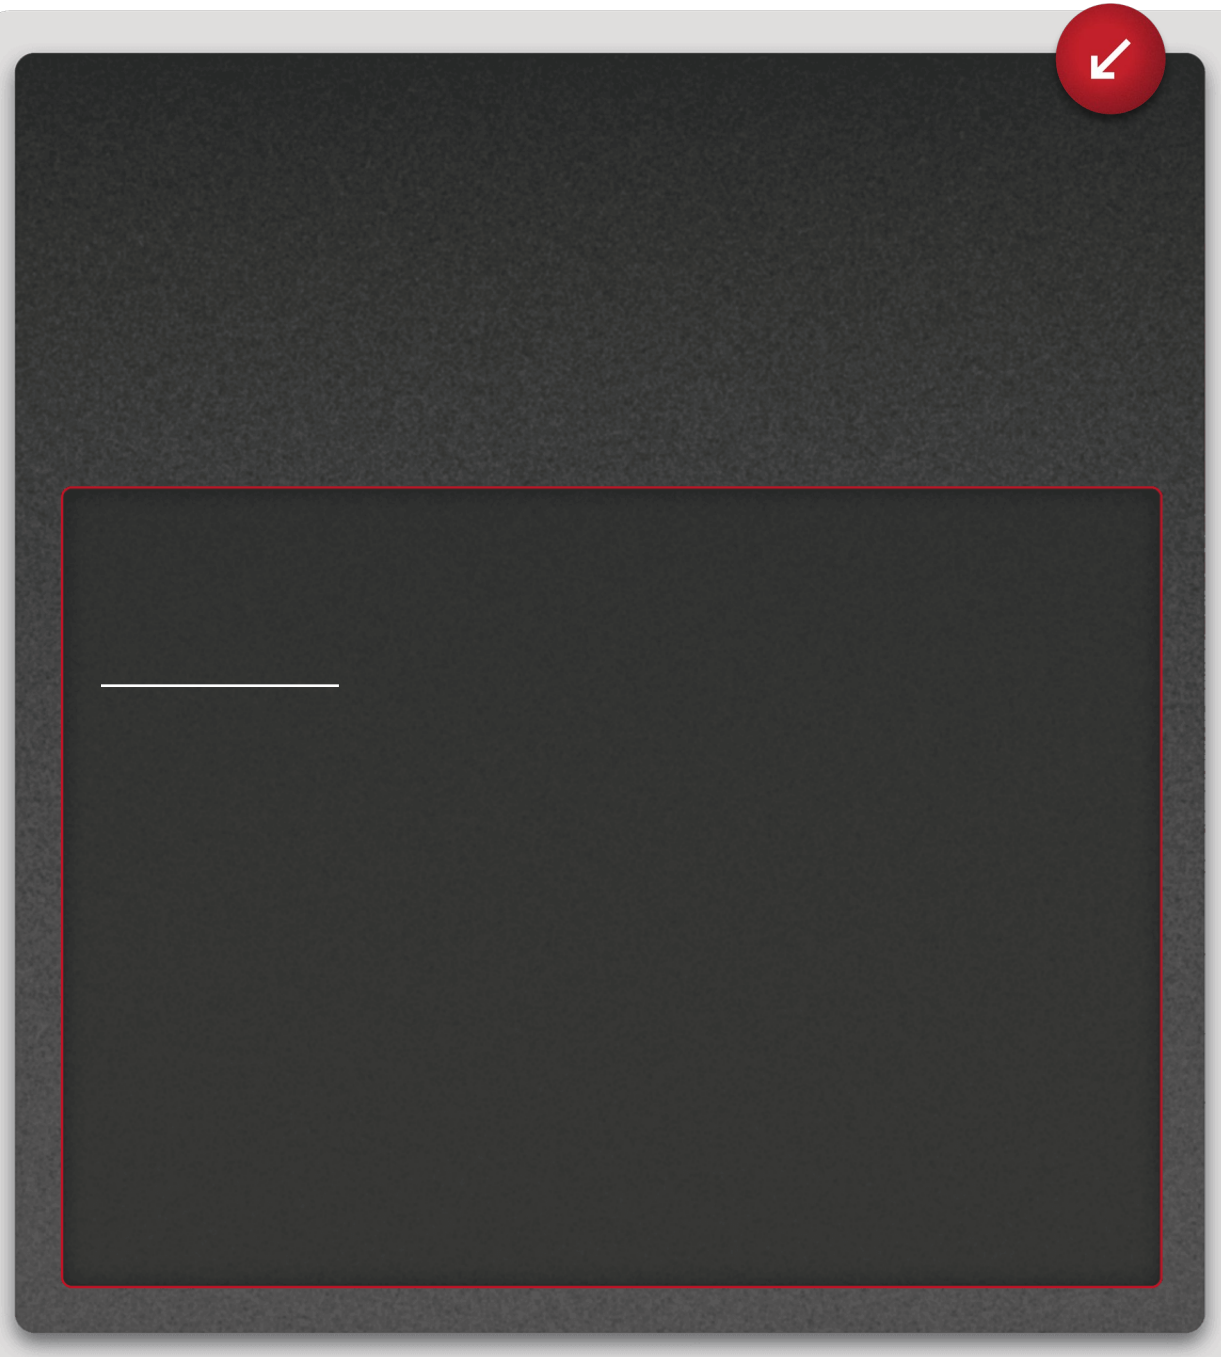

Hamilton Laboratory Solutions Product Overview

Adaptable Workstations

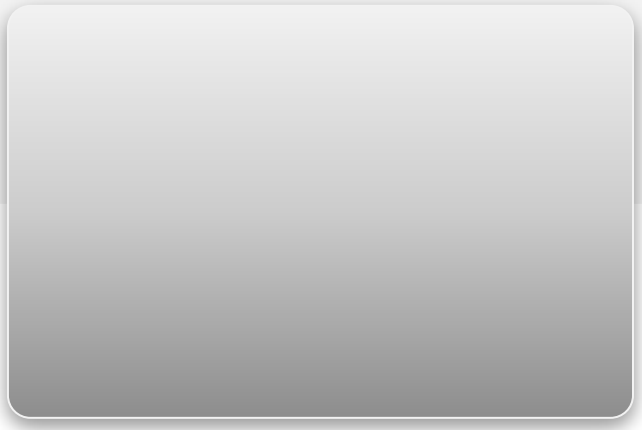

Hamilton Adaptable Workstations are designed to provide laboratories with the flexibility to reconfigure spaces as needs evolve. Featuring modular components and adjustable configurations, these workstations support changing workflows, equipment requirements, and research activities without the need for extensive renovations. Built for durability and functionality, Adaptable Workstations help laboratories maximize efficiency, improve collaboration, and create environments that can adapt to future demands.

Best Practices for Presenter Profile Word Counts:

Super Short/Social (25-50 words): Ideal for social media, quick introductions, or app signage.

Short/Standard (50-100 words): Best for conference websites, programs, and speaker one-sheets, providing a 2-3 sentence overview of expertise.

Medium/Long (150-250+ words): Suitable for workshop materials or detailed speaker pages that require more depth.
