

SoC SYSTEM ON A CHIP

The SoC Solution saves time, money & is easy to use

All-in-One Solution

With no external media player to protect, the SoC screens become an all-in-one system. Plug it in, set it up, & it's ready to go.

Total Cost of Ownership Reduced to 41%

SoC's easy installation & management capacity reduces overall ownership costs, offsetting the expense vs. a traditional screen.

Order Confirmation Integration

Our system integrates with your POS, allowing order confirmation screens on the menu & eliminating the need for a separate OCU screen.

Reduced Installation & Maintenance Costs

Faster installation with less complexity. Reset of screens no longer requires a trip outside to remove the shroud. Reset can be performed remotely.

Proven Software for Easy Menu Changes

With our proven software, store managers can easily swap out images to promote LTO's or other specials.

Point of Sale OS Integration

Our proprietary software can work with most POS systems. The ability to update prices is simple, clear-cut & real time.

Reduced Failure Points

With the elimination of the media player, no extra cables or housing units required with SoC - eliminating up to fifteen failure points in a menu board, including weather-proofing/ reliability concerns.

More Reliable Performance

With no external media players, the system is more stable and less prone to failures. SoC has an uptime of 99%+.

Lower Power Requirements

With no external media players, the menu board requires one electrical circuit instead of two.

DIGITAL SOLUTIONS

Quality. Reliability. Innovation.
