## AirLink™ 5AMP Power Pack

enabled by Lutron®

Catalog #: **ALPP 5ACC**  
 or **ALPP 5A**  
 Part #: **632641 or 622559**

The 5AMP power pack is a radio frequency device that controls up to 5A of general purpose load based on input from wireless switches, ceiling-mounted wireless occupancy & daylight sensors. An optional low-voltage dry contact closure output is available to communicate occupancy status to 3rd-party systems such as HVAC controllers. Communication with RF input devices, such as wireless switches & ceiling-mounted wireless sensors, is accomplished using Lutron Clear Connect RF Technology.

### Applications

Small offices

Conference rooms

Classrooms

Lounges

### Features

- All AirLink wireless controls are compatible with the wireless hub which enables a simple setup process using a standard web browser on any Wi-Fi enabled phone, tablet or computer. The hub also enables control and monitoring of all wireless devices
- Capable of switching 5A of general-purpose loads
- Optional low-voltage dry contact closure output provides integration to building management systems, HVAC, VAV, etc.
- Receives wireless inputs from up to 10 wireless switches, 10 ceiling-mounted wireless occupancy/vacancy sensors & 1 ceiling-mounted wireless daylight sensor
- Mounts to a junction box through a standard half-inch (NPT trade size) knockout
- LED status indicator shows current load status & provides programming feedback
- Power failure memory: If power is interrupted, connected loads will return to the previous level prior to interruption
- Daylighting can be overridden by pressing the ON button on any associated wireless switch. Daylighting is re-enabled after 2 hours or after the room become unoccupied

### Specifications

#### Regulatory Approvals

- COFETEL
- CSA & IC
- Complies with requirements for use in a compartment handling environmental air (plenum) per NEC® 2011 300.22(C)(3)
- UL Listed, UL 2043 Plenum Rated, NOM, and FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rule

#### Power / Load

- Operating voltage: 120 – 277 V  $\ominus$  50/60 Hz
- Maximum load: 5A general purpose. No minimum load requirements
- Load types include (but are not limited to): Incandescent, MLV, ELV, Resistive, Inductive, Magnetic fluorescent, Electronic fluorescent
- Motor rating: 1/6 HP (120V $\ominus$ ), 1/3 HP (277V $\ominus$ )

### Certifications & Affiliations

Canada: Industry  
Canada (IC)

## Specifications (continued)

### Environmental

Ambient Operating Temperature: 32°F to 131°F (0°C to 55°C), 0–90% humidity, non-condensing; indoor use only

### Range

- Lutron Clear Connect RF Technology allows for 30ft (10m) of range

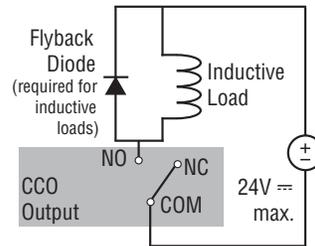

### Softswitch

- Lutron's Softswitch circuit eliminates relay arcing at mechanical contacts
- Extends relay life to an average of 1 million cycles
- Output is non-latching

### Contact Closure Output (CCO version only)

- Provides occupancy status to 3rd-party equipment such as building management systems, HVAC & VAV controllers
- Provides both normally open (MNO) and normally closed (NC) dry contacts
- Maintained output type
- CCO terminals accept 20 to 16AWG (0.5 to 1.5mm<sup>2</sup>) solid or stranded wire
- Output is latching
- Not for voltages greater than 24V
- The CCO is not rated to control unclamped inductive loads. Inductive loads include, but are not limited to: relays, solenoids, and motors. To control these types of equipment, a flyback diode must be used (DC voltages only)

### Contact Closure Output

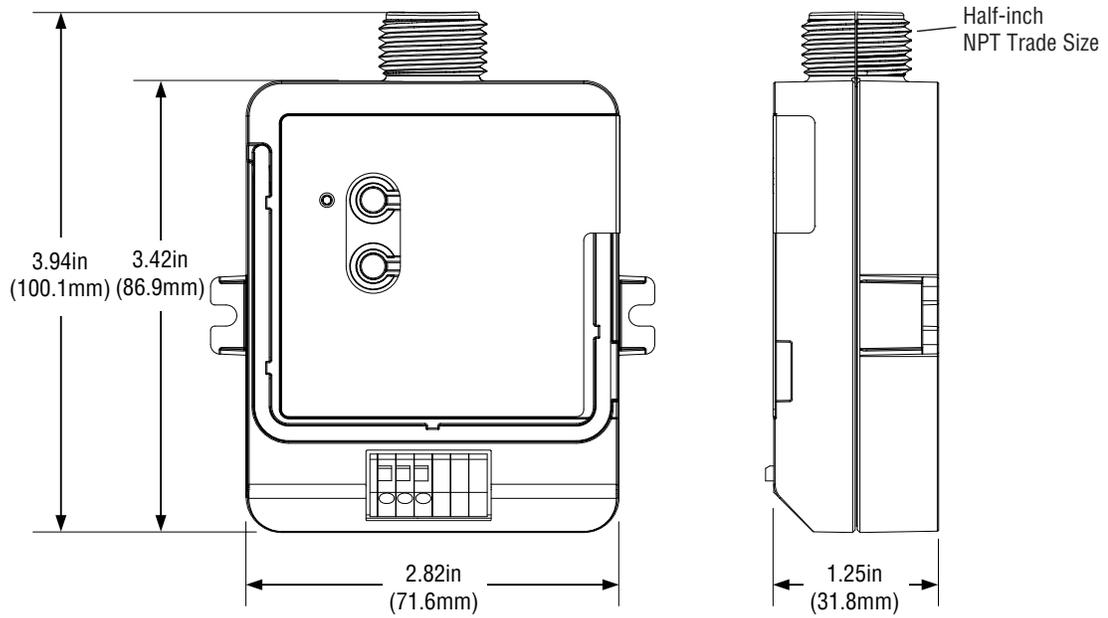

Switching Voltage	Resistive Load
0-24V $\equiv$	1.0A
0-24V $\ominus$	0.5A

## Ordering Information

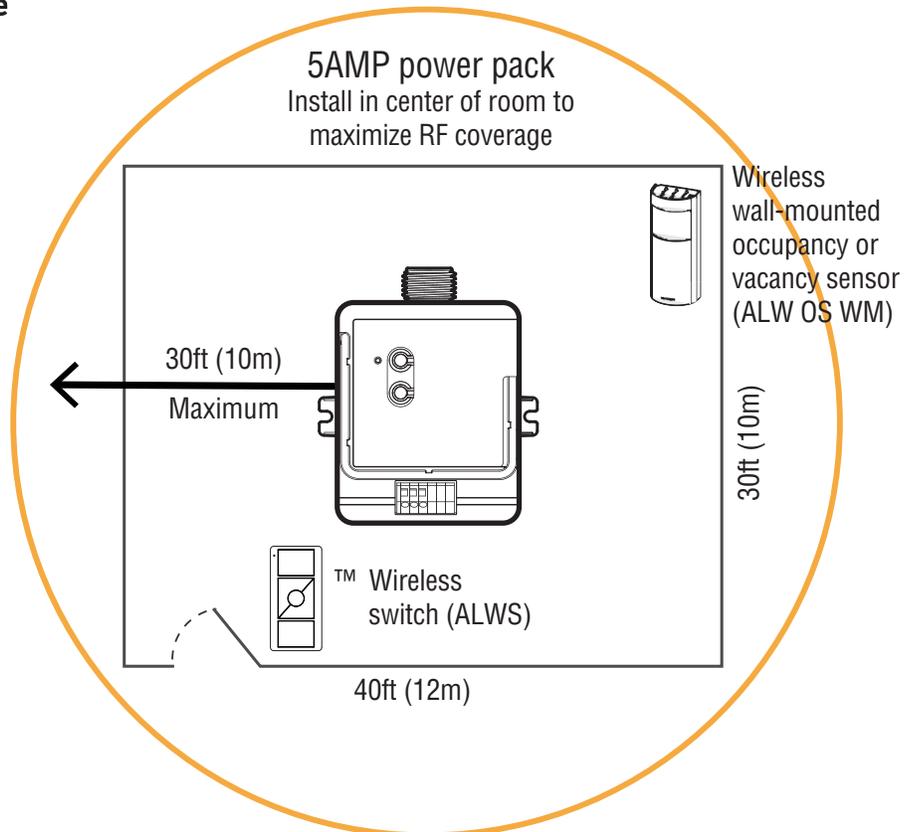

Part #	Catalog #	Description
632641	ALPP 5ACC	AirLink System – 5AMP Power Pack, ON/OFF, contact closure output
622559	ALPP 5A	AirLink System – 5AMP Power Pack, ON/OFF

### Dimensions

### Fixture Range

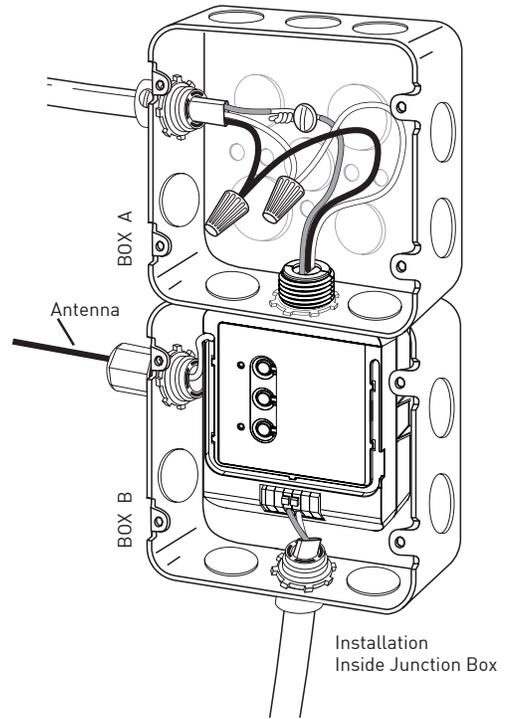

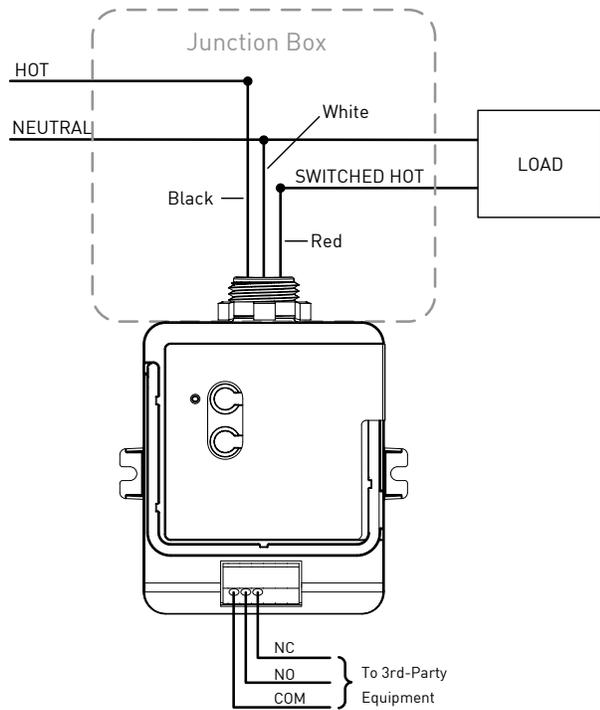

CCO Operation affected only by associated occupancy or vacancy sensors

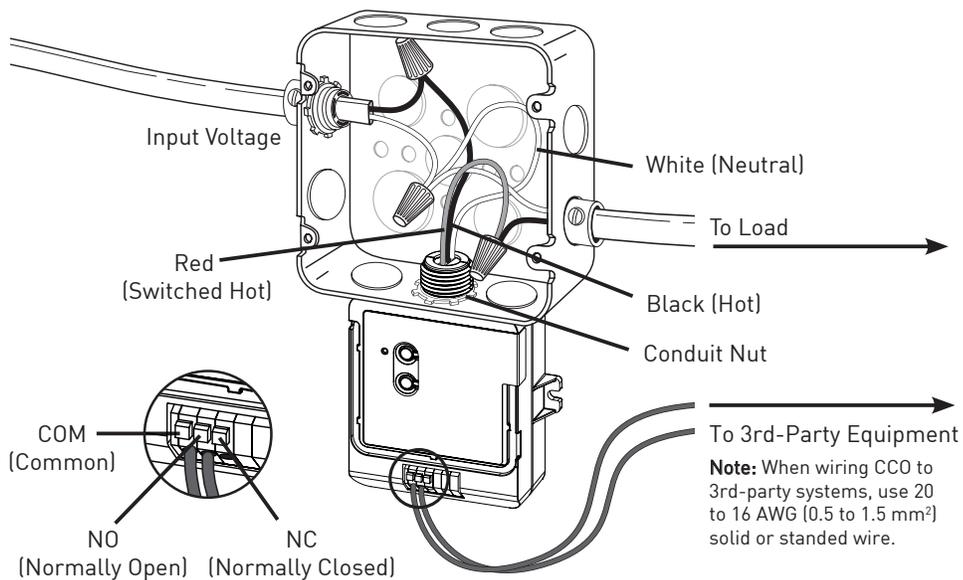

**Room Occupied:** NO = Close NC = Open

**Room Unoccupied:** NO = Open NC = Close

### Wiring Diagram

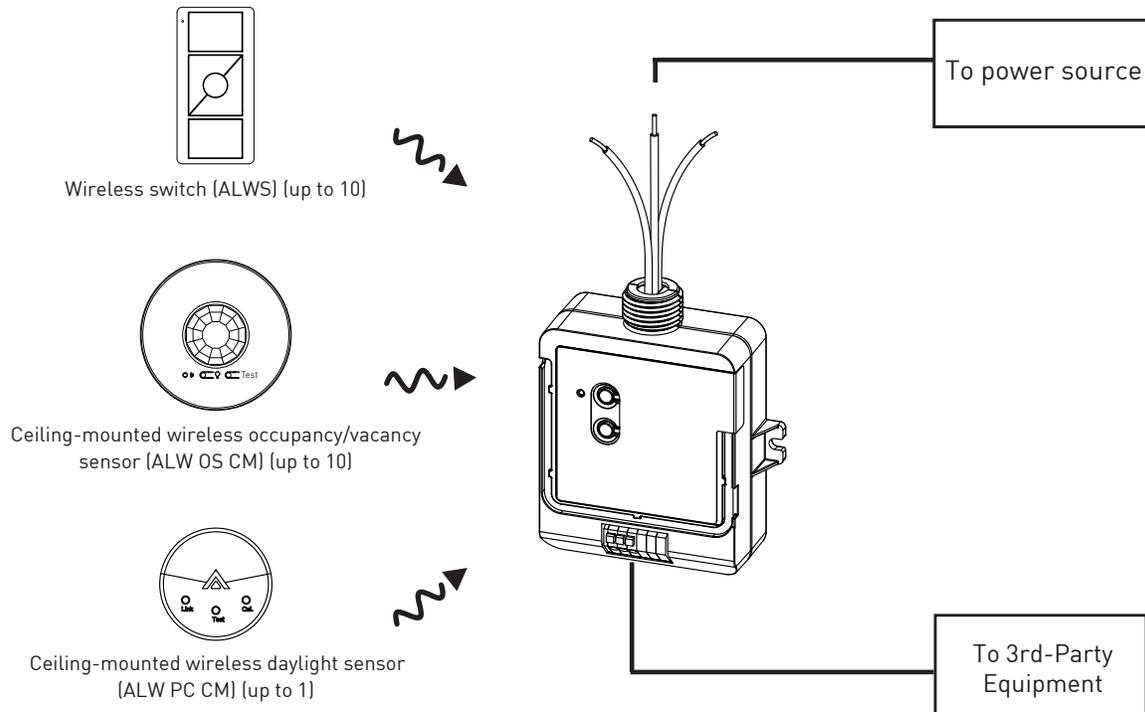

In some applications, an the power pack can be installed inside a 4in X 4in (102mm X 102mm) junction box.

### System Diagram

### Default Operation

Transmitting Device	Transmitted Command	Load Relay Default Action	CCO Default Action
Wireless Switch	On	Close	No Action
	Off	Open	No Action
	Raise/Lower	No Action	No Action
	Preset	Close	No Action
Ceiling-Mounting Wireless Occupancy Sensor	Occupied	Close	NO = Close NC = Open
	Unoccupied	Open	NO = Open NC = Closed
Ceiling-Mounted Wireless Vacancy Sensor	Occupied	No Action	NO = Close NC = Open
	Unoccupied	Open	NO = Open NC = Closed
Ceiling-Mounted Wireless Daylight Sensor	Ambient Light Below Target Level	Close	No Action
	Ambient Light Above Target Level	Open	No Action

## The AirLink System

### Wireless controls & sensors

Wireless remotes & switches

Occupancy/Vacancy & Daylight sensors

AirLink-integrated Fixtures

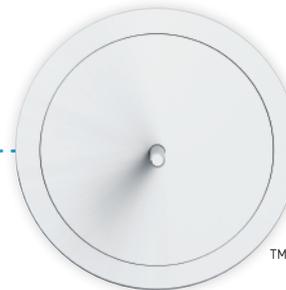

AirLink-compatible Fixtures

Plug load controllers

### Centralized control & integration

Wireless hub

Wired / Ethernet

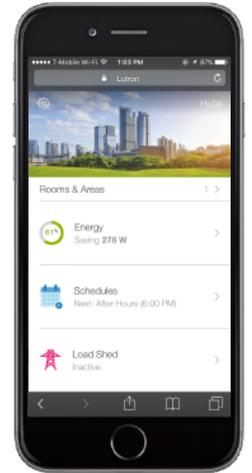

Demand Response

BACnet integration

### Simple-to-use software

Lighting control web app
