## BUILT FOR YOUR WAREHOUSE

The United States has nearly 18 billion square feet of warehouse and distribution center space, and that figure is expected to rise as consumer shopping habits continue to shift online. From the loading docks to the aiseways, and everything in between, the right lighting is crucial to ensure a safe and productive work environment.

With a comprehensive range of energy-efficient lighting solutions tailored to meet the unique requirements of any facility, LSI helps warehouses, distribution centers, and big box stores achieve maximum safety, visibility, and productivity. Enhance your facility with the most advanced, American-made industrial lighting solutions on the market with our comprehensive lighting and controls offerings.

# YOUR INDUSTRIAL FACILITY

## A HIGH BAY

No two facilities are alike. That's why we offer a robust line of linear and round high bay fixtures. With up to 100,000 lumens, available battery backup, numerous control and sensor options, there's a high bay fixture for every application.

## B ENCLOSED & GASKETED

Strip lighting provides a flexible, cost-effective solution for just about any space, due to its compact design. For harsh environments and specialty applications such as cold storage, our vaportite fixtures get the job done reliably. Available in various form factors and with multiple lumen packages, mounting options, and colors, our strip and enclosed & gasketed fixtures bring uncompromising utility.

## C OUTDOOR

Area lighting and wall sconces are a must for keeping parking areas, loading docks, and the building façade illuminated at all hours of the day. Our extensive outdoor lineup provides plenty of options for keeping the entire property well lit, ensuring productivity through the night.

## D SPECIALTY AND DOCK

Required by code for any facility, we offer a full line of emergency and exit lighting solutions. Our heavy-duty dock light is a must for any facility, with an adjustable arm that can swivel 360-degrees, easily illuminating any area with 3,400 lumens.

# INDOOR

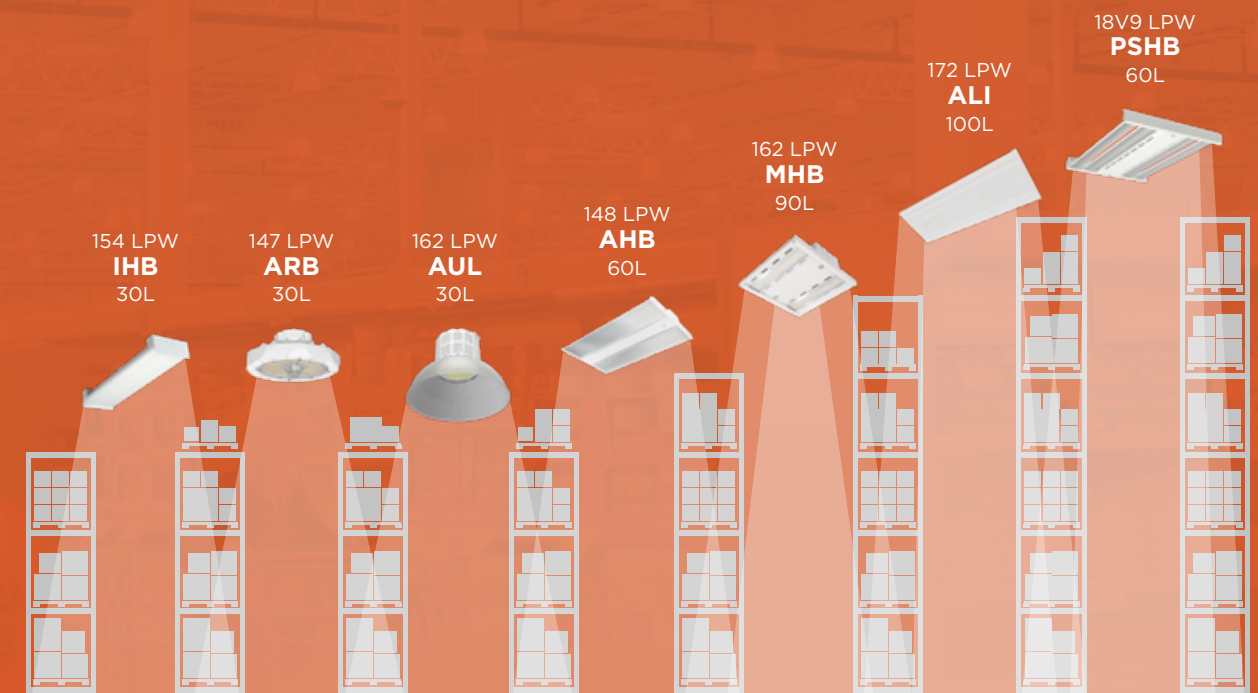

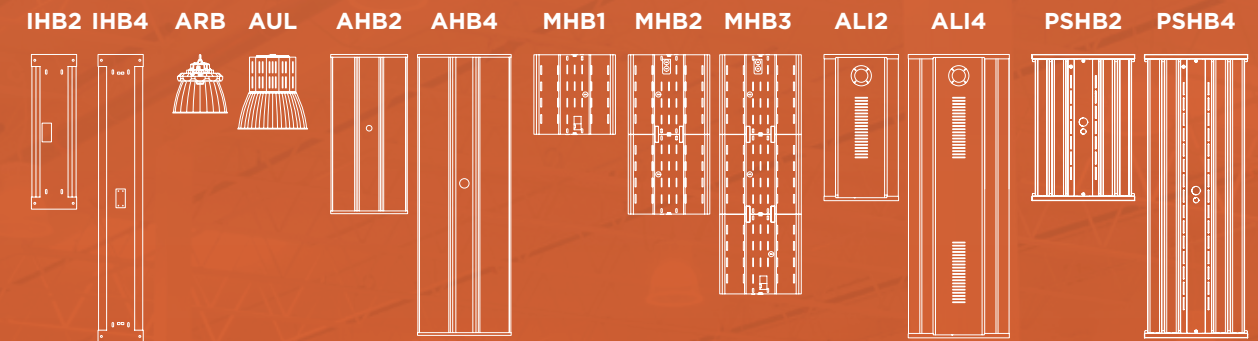

Large spaces such as warehouses and distribution center present a lot of unique challenges, making lighting one of the most important but often overlooked factors.

A single multipurpose warehouse could include narrow aisles of racking and pallet storage reaching toward the rafters, assembly & manufacturing areas, cold storage, loading docks, offices, and more.

To confront these challenges, LSI offers a suite of solutions, including our Alliance High Bay, available in multiple form factors with an industry-leading 100,000 lumens and custom optics. Having this level of versatility is essential for delivering the right levels of light to the right locations with high levels of control.

## HIGH BAY PRODUCT POSITION GUIDE

- Energy efficient and contractor-friendly lighting solutions
- Lightweight designs allow for minimal installation effort
- Form factor and lumen packages for every application

### BUT WHAT ABOUT THE REST OF YOUR FACILITY?

Our selection of high bays, low bays, strips, vaportites, dock lights, and more are designed to deliver performance, versatility, and value throughout your industrial or commercial space.

Automate your lighting with AirLink Blue controls! [LSIcorp.com/airlink-blue](http://LSIcorp.com/airlink-blue)

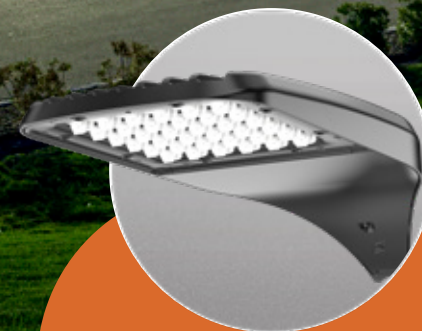

Linear and round high bay fixtures for every application.

# OUTDOOR

Like a beehive, the inside of a warehouse or distribution center is a busy place, but the outside isn't much different. Trucks are coming and going with deliveries and materials, employees are arriving for their workday or leaving after their shift. That makes outdoor lighting every bit as important as indoor, but think beyond the parking lot.

For optimal security, the exterior of the building should be well lit, even in the less heavily trafficked areas. Entry and exit points should be inviting, making employees and visitors feel safe at any time of day. The delivery and loading dock areas are critically important, too. LSI offers a wide selection of area lights, floods, wallpacks, and more, to keep every inch of your facility covered in light in any condition.

**MIRADA MEDIUM AREA**  
Outdoor Area Light (MRM)  
7,000 - 48,000

**MIRADA MEDIUM WALL**  
Outdoor Wall Sconce (XWM)  
55,000 - 75,000

**ABOLITE® ANGLED REFLECTOR**  
Architectural RLM Series (AD)  
12,000 - 90,000

# SPECIALTY

In addition to standard indoor and outdoor lighting, most industrial facilities need dedicated solutions for cold storage, specialty manufacturing, dock lighting, and exit & emergency. LSI has you covered here, too, with a full lineup of vaportite solutions for cold storage, highly maneuverable lighting for the dock and delivery bays, and much more.

**EXIT SIGNS**  
Slim and Low Profile  
Red/Green Signs (EX)  
NiCad Battery Backup

**EMERGENCY LIGHTS**  
Adjustable Emergency  
Light (EAR)  
90 min. NiCad Battery Backup

**DOCK LIGHT**  
Adjustable Dock Light  
3,400

# POLES & ACCESSORIES

LSI's full line of steel poles are available in a variety of shapes and heights and are fabricated with custom drill patterns and banner arm attachment options.

With optional DuraGrip® Plus coating, our poles are unmatched in their corrosion resistance and durability.

Our supplementary line of steel and aluminum brackets provide virtually limitless possibilities for fixture and accessory mounting. Whether you're simply looking for a quick install or need an easy way to retrofit something for an existing pole, we've got you covered.

# CONTROLS

With our exclusive AirLink Blue Controls, you can intuitively manage any lighting system right from your iPhone or Android device, from a handful of fixtures in a single location to a few hundred covering an entire sports and recreation complex across multiple acres.

Easily integrated with any lighting project, AirLink Blue also meets the most rigorous of regulatory requirements, saving you time and money while enhancing safety and reducing energy consumption.

## POLE FABRICATION

Square, round, and round tapered<sup>1</sup>

• Square <sup>2</sup>	4, 5, and 6"	14' - 39'
• Round <sup>2</sup>	4 and 5"	10' - 39'
• Tapered	4 and 5"	20' - 39'

## ACCESSORIES

Available on all poles

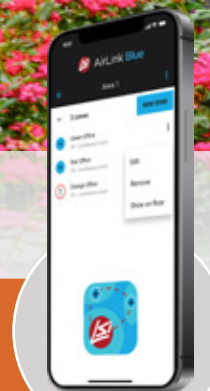

- Tenon top adaptor
- Universal mounting bracket
- Quick-mount bracket
- Wooden pole bracket

## AIRLINK BLUE

Wireless Control System (ALB)

- Outdoor and indoor lighting applications
- Integrated fixture sensor modules
- Bluetooth mesh network
- Web and mobile app enabled

<sup>1</sup> BANNER ARMS ATTACHMENT AVAILABLE FOR ALL POLES. <sup>2</sup> DIRECT BURIAL AVAILABLE FOR SQUARE AND ROUND 4" AND 5" POLES.
