

Description: HID Challenger Vertical Burn Series (CVF)

LSI Agents and Internal Staff,

As we restructure our product portfolio, it is necessary to streamline and evolve our core LED product offering. This will allow us to focus on *newer, more innovative designs and emerging technologies* that are aligned with vertical markets and customers' requirements.

Per our previous webinars on the new Slice (SLM), our legacy Challengers Vertical Burn HID (CVF) product is being phased-out and discontinued effective immediately as we have depleted our remaining inventory on this product. All new orders, will be transitioned to the new Slice (SLM) series. Returns (RMAs) for the Challenger Vertical Burn HID (CVF) product will be subject to our terms and conditions. Due to the similar look / design of the new Slice (SLM), we are recommending it be used for any replacement or warranty issues on the Challenger Vertical Burn HID (CVF).

All technical information will be removed from our website on 09-30-18.
