# Central Base Station

The Central Base Station can be installed anywhere you need wireless push-button lighting control, such as municipal ballparks, hockey arenas, basketball facilities, and other multi-use complexes. The heart of the Central Base Station is the AirLink Synapse Site Manager, contained in the NEMA 4X enclosure. A bank of 5 buttons enables manual control of the site lighting. The Central Base Station makes it easy for electricians to quickly install the site controller and enables quick and simple access to a switch station that can be programmed to meet the needs of the end-user.

## FEATURES & SPECIFICATIONS
