

# LED ARCHITECTURAL HIGH-LUMEN FLOODS (SAFL)

**CONSTRUCTION:** Die-cast aluminum housing with integrated proprietary thermal management to insure low LED junction temperature. The low profile design and aesthetics makes it suitable for a wide range of commercial applications. Utilizing anti-aging silicone rubber, the fixture is completely sealed and gasketed, ideal for wet locations, and is IP65 rated. The LED light engine and optic lenses are protected with clear tempered glass lenses that are secured with stainless steel hardware.

**LEDs:** Select high quality LEDs are utilized, with 4,000 – 5,000K CCT and CRI of  $\geq 70$  / CRI of 80 (depending)

**ELECTRICAL:** Universal Voltage (120-277V, 50/60 HZ) and 347-480V input.

**DIMMING:** 0-10V dimming standard

**OPERATING TEMPERATURE:** -40°C through 45°C (-40°F through 113°F)

**OPTICS:** Delivers precision light quality via light engine and optical lens combinations, which are designed to distribute light in both the vertical and horizontal angles with a very specific beam pattern. Beam angle options include lenses with either 15° (SP), 30° (MF) or 85x135x (WF).

**PHOTOMETRICS:** Please visit our web site at [www.lsi-industries.com](http://www.lsi-industries.com) for detailed photometric data

**EXPECTED LIFE:** Minimum 50,000 hours

**WARRANTY:** Limited 5-year warranty

**LISTING:** ETL listed to U.S. and Canadian safety standards. Suitable for wet locations (IP65). For a list of the specific products in this series that are DLC listed, please consult the LED Lighting section of our website or the Design Lights website at [www.designlights.org](http://www.designlights.org)
